Biggest Toy Department TOYS

All the Toy Stores cannot be best and biggest; all can claim to be; most of them do; the verdict is a matter of individual judgment.

To settle the matter for yourself, go to all the other stores in town before you come here. The things you will see and the prices you will hear on the sixth floor, all the 64,000 square feet of which is devoted to this mammoth exhibition, will carry strong conviction to your mind concerning the relative merits of Macy's merchandise and the accuracy of our statements.

To facilitate your buying, and to assist you in your buying, you may secure the services of an experienced general salesperson and store guide at the Superintendent's desk on any floor.

Our 1911 prestige and power began in 1858, and over half a century growth makes our Toy Department what it is to-daythe greatest ever known.

The importance of this statement will best be appreciated by those who are aware of our conservatism in making statements. We do not claim to be perfect. It is just as well that we are not, because the attainment of the ideal would leave nothing more to be accomplished. What we do claim is that we are closer to the ideal than any other store in the country.

What is true of our Toy Department is true of everything else in our 25-acre store. We have not reached that stage to which we aspire, but we are nearer to it than any other store.
